

A Pfizer-sponsored symposium at:
The 7th Congress of the European Academy of Neurology

ATTR amyloidosis – navigating this multifaceted disease

Sunday, 20th June 2021
18:30–20:00 CEST

Transthyretin amyloidosis (ATTR amyloidosis) is a rare and complex disease with varied manifestations, which brings substantial challenges to its diagnosis and management.¹ Join us for a symposium where we will discuss how, as a clinical community, we can work together to reduce the disease burden in patients with ATTR amyloidosis by addressing:

- Indicators that should raise suspicion of ATTR amyloidosis in the undiagnosed patient
- The importance of early diagnosis of ATTR amyloidosis
- The need for multisystem disease assessment to identify those patients with both neuropathic and cardiac features

The session will conclude with an insightful ‘mock’ multidisciplinary team meeting, during which our faculty will illustrate the need for a collaborative approach across medical specialities to effectively manage this devastating disease.

Please click [here](#) to register and join the satellite symposium.*

*Registration fees apply.

SPEAKERS

Isabel Conceição
 Consultant in Neurology and Clinical Neurophysiology
 Centro Hospitalar Universitário Lisboa Norte, Hospital de Santa Maria
 Lisbon, Portugal

Laura Obici
 Internal Medicine Specialist
 Amyloid Research and Treatment Center, IRCCS Fondazione Policlinico San Matteo
 Pavia, Italy

Wolfgang Löscher
 Professor for Neurology
 Innsbruck Medical University
 Innsbruck, Austria

Gerhard Pözl
 Specialist in Internal Medicine and Cardiology, Psychotherapist
 Innsbruck Medical University
 Innsbruck, Austria

AGENDA

Chair: Isabel Conceição (Portugal)

18:30–18:35	Welcome and introduction	Isabel Conceição
18:35–19:00	Transthyretin physiology and pathophysiology: Two sides of the same coin	Laura Obici
19:00–19:20	Management of ATTR amyloidosis: The benefit of early diagnosis	Isabel Conceição
19:20–19:45	Inside the multidisciplinary team: A practical approach to managing ATTR amyloidosis	All faculty
19:45–19:55	Q&A	All faculty
19:55–20:00	Summary and close	Isabel Conceição
